TATJANA KADAK

Frontend Engineer | Angular / Accessibility

PROFILE SUMMARY

Frontend Engineer specializing in Angular and Digital Accessibility with 7+ years of experience designing and delivering enterprise-grade web applications for banking, public-sector, and logistics organizations. Certified Accessibility Specialist (A4Q) with strong expertise in accessibility engineering, WCAG-compliant development, scalable Angular architecture, reusable component systems, accessibility reviews, developer training, and modern frontend engineering practices.

CORE EXPERTISE

▼ Frontend Development:

Angular, TypeScript, JavaScript, HTML5, SCSS/CSS, Responsive Design

▼ Accessibility:

WCAG 2.1 AA, WAI-ARIA, Semantic HTML, NVDA, VoiceOver, Accessibility Audits

▼ Architecture:

Signals, Signal Stores, Component Libraries, Micro Frontends, Modular Frontend Architecture

▼ Integration:

REST APIs, API Integration, Node.js, SQL, XML, XSLT

▼ Tools & Methods:

Git, Jira, Postman, Figma, Clockify, Scrum, Kanban

EXPERIENCE

TKWeb OÜ — Founder | Freelance Frontend Engineer (Remote)

10/2025 – PRESENT

Providing frontend development services through own company, specializing in Angular, accessibility, and enterprise web applications

▼ Reference Project – Smart Parcel System Backoffice:

- Sole frontend engineer responsible for architecture and implementation of a modern Angular-based backoffice application for parcel, worker, and operational management
- Built the application using the latest Angular features including Signals, Signal Stores, standalone components, and reactive architecture
- Designed scalable frontend architecture and reusable UI patterns for long-term maintainability
- Implemented accessibility best practices aligned with WCAG 2.1 AA
- Collaborated closely with backend developers and product stakeholders in agile development process
- Continuing to provide ongoing support and maintenance as needed

TATJANA KADAK

Frontend Engineer | Angular / Accessibility

SEB BANK AS – TALLINN, ESTONIA | Frontend / Software Developer

03/2022 – 03/2025

Developed and enhanced enterprise-scale digital banking applications within one of Northern Europe's leading financial institutions.

▼ **Reference projects:**

- Designed and implemented Angular-based frontend solutions for online banking platforms in enterprise-scale environments
- Delivered accessible, WCAG-compliant user interfaces across customer-facing and internal banking applications
- Conducted accessibility reviews, audits, and quality assurance activities across customer-facing and internal banking applications
- Acted as accessibility advisor for development teams across Baltic markets, providing guidance on WCAG compliance, accessibility remediation, and implementation best practices
- Delivered accessibility workshops and training sessions for developers, designers, and product teams, helping establish accessibility awareness and adoption across multiple teams
- Contributed to accessibility governance by supporting standards, review processes, and reusable implementation patterns across digital banking platforms
- Developed reusable component libraries to standardize UI implementation across multiple frontend applications
- Collaborated closely with cross-functional teams, including architects, designers, backend developers, and product stakeholders, in agile delivery processes

ANDMEVARA AS – TALLINN, ESTONIA | Web Developer

04/2019 – 02/2022

Developed digital government and public-sector web solutions with strong focus on accessibility, usability, and maintainable frontend architecture.

▼ **Reference project: KOVTP Municipal Service Portal**

- Designed and developed web platform used by over 90% of Estonian municipalities and numerous public-sector organizations
- Took ownership of frontend design, UX/UI, and accessible implementation in compliance with WCAG standards
- Translated business and usability requirements into scalable, user-friendly web solutions
- Improved maintainability and reduced development effort through centralized reusable frontend components

▼ **Reference project: Estonian Patent Office Digital Patent Service**

- Developed scalable prototype for digital patent application service with focus on accessibility and long-term maintainability
- Applied UX and accessibility best practices to improve usability and user experience
- Contributed to solution design and technical implementation of complex multi-step digital workflows

CGI EESTI AS – TALLINN, ESTONIA | Support Engineer

06/2014 – 03/2019

Worked on enterprise integration, forecasting, and support solutions for international energy-sector and enterprise clients.

- Provided Level 3 support for enterprise forecasting and transformation software
- Analyzed and resolved complex system, data flow, and algorithm issues
- Developed and maintained XSLT transformations and BizTalk ESB integrations

- Collaborated with development teams to improve system quality, stability, and performance

EDISOFT ESTONIA OÜ – TALLINN, ESTONIA | Software Consultant

09/2012 – 03/2014

Delivered enterprise EDI integration solutions for automation of cross-company business processes

- Implemented EDI integration projects for enterprise clients
- Developed XSLT transformations and interface mappings
- Supported customers during implementation, onboarding, and ongoing technical coordination

EDUCATION

THE ESTONIAN ENTREPRENEURSHIP UNIVERSITY OF APPLIED SCIENCES (EUAS) / EESTI ETTEVÕTLUSKÕRGOOL MAINOR – TALLINN, ESTONIA

▼ **Bachelor of Arts in Web Development | Degree: 2013**

- Focus on frontend and backend web technologies with emphasis on accessibility and usability
- Thesis: *WAI-ARIA Testing Specifications – Semantic Description of Accessible Web Interfaces Using WAI-ARIA*

CERTIFICATIONS

▼ **A4Q Certified Professional for Digital Accessibility | October 2025**

- Score: 97.5%
- Validated expertise in WCAG 2.1 AA, EN 301 549, WAI-ARIA, accessibility testing tools, and inclusive frontend development practices

ADDITIONAL INFORMATION

▼ **Languages:**

- German: Basic working knowledge (A1, currently improving)
- Russian: Native language
- Estonian: Fluent
- English: Fluent
